QLIK SENSE

NEW GENERATION OF DATA ANALYSIS

Qlik Sense is the benchmark in the next generation of data analytics. With its unique Augmented Intelligence (AI) associative analytics engine and flexible deployment options, it can empower everyone in your company to make better decisions every day, creating a truly data-driven business.

Limitless exploration
Qlik Sense indexes and understands all the relationships between your data so you can freely explore in any direction.

Create analytics faster
Easily combine and load data, create intelligent visualisations and use drag and drop to create advanced analytics apps, accelerated by AI suggestions and automation.

Let AI broaden your mind
AI enhances human intuition in Qlik Sense with suggested information, automated processes and natural language interaction.

Share and access on your mobile
Stay productive online or offline with fully interactive mobile analytics.

Build, expand, incorporate
Develop any analytics with a full set of open APIs, integrate them into any app, project or process.

Your infrastructure, your choice
Start analytics quickly with the SaaS option or easily deploy on-premise or in a cloud environment of your choice.

Democratized data

Want to get the most value out of your data? Qlik's end-to-end strategy takes raw data from your company and transforms it into information available to the entire team on an easy-to-use dashboard without compromising security policies.

Augmented Intelligence

It is the combination of Artificial Intelligence and human Intuition, which we use to increase the data literacy of your entire workforce. Based on Qlik's unique Associative Indexing technology, Qlik automatically finds and highlights insights for users to explore.
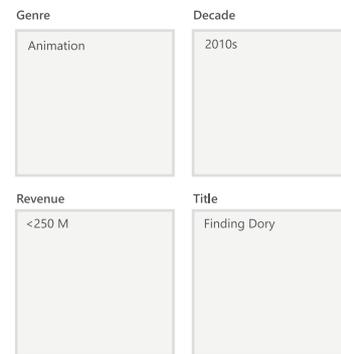

Integrated everywhere

The competitive advantage comes from new discoveries made in all areas of your business.
Qlik extends analytics to any data that benefits your business.
Whether it's gathering insights from the Internet of Things (IoT), helping forecast sales, or providing visibility into operations.

Qlik's Associative Engine
