

# F5 DS DIGITAL SIGNAGE

## CONTENT COMMUNICATION SYSTEM

The F5 DS allows for the transmission of content through monitors and TVs with a scheduled agenda. Changes to the content (playlists) can be made instantly and customized for each individual monitor or TV. It also allows for centralized management of all content and screen networks. This solution can display KPIs - Key Performance Indicators - internal communications, news, among others. You can thus turn your monitors and TVs into true communication platforms.

## HARDWARE

Multiplatform

TV or Monitors

Server

## CONTENT

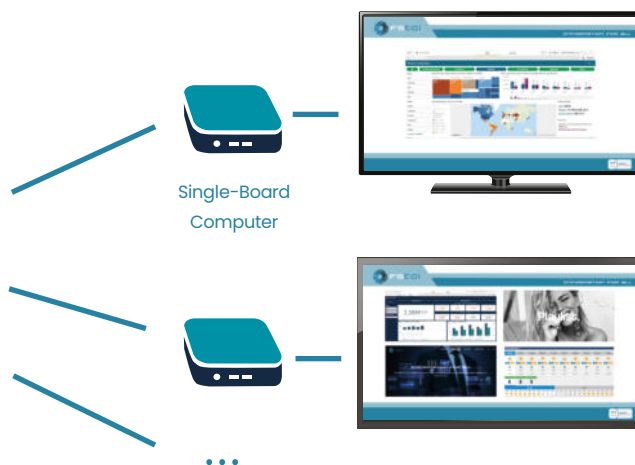

Corporate content

External content

Key Performance Indicators

## FEATURES

Configuration  
Network monitors

Agenda
